

## FIRE RETARDANT SHADES

## ABSTRACT

5     A fire retardant solar control sun shade comprising as the shade material, a clear  
transparent film composite comprising a first transparent film layer, preferably with a  
metallized layer on one side, and a further transparent film layer adhered to said one  
side of the first film layer using an adhesive, the adhesive and at least one of said two  
polymeric film layers contain fire retardant material.
